

Ayphen HMS — Demo Speaking Script

21 steps · 17 minutes · what to click + what to say · simple sentences you can remember

Login: admin@apple.local / Demo@1234 · **URL:** care-sims.vercel.app · **Tenant:** Apple Hospital (demo)

BLOCK 1 — Login + Dashboard

1 min

#	WHAT YOU CLICK	WHAT YOU SAY (SIMPLE)
1	Type admin@apple.local + Demo@1234 → click Sign In	"This is Apple Hospital. I'm logging in as admin. Same screen works for every role — doctor, nurse, pharmacy — the system knows who you are."
2	Dashboard loads → hover the KPI cards	"Home dashboard. Live numbers — admissions today, pending labs, revenue, low stock. Built for 57 modules — I'll show you the ones that matter."

BLOCK 2 — Walk-in patient + 2 AI features

2 min

#	WHAT YOU CLICK	WHAT YOU SAY
3	Patients → open Ravi Kumar	"Patient walks in. We pull up his record — demographics, allergies, past visits — all in one screen."
4	Click Generate AI History Summary	AI #1 "First AI feature. Gemini reads 12 months of consults, prescriptions and labs — gives the doctor a 1-paragraph briefing before they walk in. Saves them flipping through old files."
5	Go to Triage → enter "chest pain, sweating, 45M" → click Get AI Suggestion	AI #2 "Second AI feature. Nurse types the complaint — Gemini suggests priority colour, red flags, recommended labs. No drug suggestions — that's a safety rule. Nurse stays in charge."

BLOCK 3 — Doctor consultation + Lab + Rx

3 min

#	WHAT YOU CLICK	WHAT YOU SAY
6	Doctor's Queue → click the patient	"Now the doctor sees the patient in their queue."
7	Type SOAP notes	"Doctor writes the consult — subjective, objective, assessment, plan."
8	Click New Lab Order inline → add CBC, Troponin, ECG → STAT → Submit	"Right here — without leaving the consult — doctor orders labs. STAT priority. Lab queue knows in one second."
9	Click Write Prescription → add Aspirin + Atorvastatin → Save	"Prescription on the dedicated page. Allergy check runs against the patient's record. Pharmacy gets it instantly."
10	Click Complete Consultation	"Consult locked. Audit trail timestamps it."

BLOCK 4 — Lab + Pharmacy + OPD Bill

2.5 min

#	WHAT YOU CLICK	WHAT YOU SAY
11	Lab page → click Enter Results on the STAT order	"Lab tech sees the queue. STAT at the top. They click Enter Results."
12	Type values → flag CBC High, Troponin Critical → Submit	"Per-row results. Flag dropdown colours critical values red. Doctor's inbox knows in seconds."
13	Click teal ✓ Validate	"Validation is a separate step — digital sign-off."
14	Go to Pharmacy → click the Rx row	"Pharmacy sees the prescription. Two items — Aspirin and Atorvastatin. Stock badge tells them what's available."
15	Click Dispense	"Dispense uses FEFO — first to expire, first out. No expired stock liability."
16	Go to Billing → open INV-DEMO-OPD-001	"The bill assembles itself. Consult fee, both lab tests, both medicines. No manual entry."
17	Click Collect Payment → Cash → Record	"Six payment methods — cash, UPI, card, insurance, cheque, NEFT. Done."

BLOCK 5 — Admission + MAR (nursing)

2 min

#	WHAT YOU CLICK	WHAT YOU SAY
18	Admissions → click + Admit Patient	"Patient gets worse — needs admission. One form. Ward, bed, doctor, package. Bed flips to occupied in the same transaction."
19	Open MAR / nursing page	"Nurse sees scheduled doses. Each dose has a 5-rights check — right patient, right drug, right dose, right route, right time. Patient safety first."

#	WHAT YOU CLICK	WHAT YOU SAY (PAUSE AFTER EACH SIDE-EFFECT)
20	Admissions → amber Discharge button on Ravi	"Patient ready to go home. I click Discharge. Watch — this is the killer moment."
21	Form opens → teal strip appears	"Form opens automatically. Look at the teal strip — patient name + admitting doctor. System pulled this from the admission record. You physically cannot link this to the wrong patient."
22	Click Generate Draft with AI	AI #3 "Third AI feature. Gemini reads the admission, every consult, every prescription, every lab result during the stay — drafts the entire summary."
23	Edit one field briefly	"Doctor stays in control. They review, edit, sign off. AI assists — it doesn't decide."
24	Click Create Draft	"Status: Draft. Saved but not final."
25	Click Approve on the draft row	"And now — one click — watch what happens in the database."
26	Show Admissions list (Ravi DISCHARGED)	"Admission flipped to discharged."
27	Show bed → CLEANING	"Bed is now flagged for cleaning."
28	Show Housekeeping → new HIGH task	"Housekeeping has a high-priority task — patient name and admission number in the description. And if the patient had email, they got the summary by email. Four things, one click, all atomic. If anything fails, everything rolls back."

BLOCK 7 — Final IPD Bill

1 min

#	WHAT YOU CLICK	WHAT YOU SAY
29	Billing → open INV-DEMO-IPD-001	"Final IPD bill. Five days of ICU. Bed charges, doctor rounds, nursing, IV antibiotics, lab bundle, X-ray, package discount, consumables. Net twenty-seven thousand three hundred."
30	Collect Payment → UPI ₹15,000 → Record → Insurance ₹12,300 → Record	"Patient pays fifteen thousand via UPI. Insurance covers the rest — twelve thousand three hundred. Both payments are separate audit entries."

BLOCK 8 — Reports AI + Multi-tenant + Wrap

2.5 min

#	WHAT YOU CLICK	WHAT YOU SAY
31	Reports → Revenue tab → click AI Insights	AI #4 "Fourth AI feature. Gemini compares last 30 days vs prior 30 days. Writes the CFO commentary in plain English. No spreadsheet needed."
32	Click Seasonal Trends	AI #5 "Fifth AI feature. This month vs same month last year. Powers staffing and procurement planning."
33	Logout → login as Platform Admin (admin@ayphen.io)	"And the whole thing is multi-tenant. Everything you saw on Apple is isolated by tenant ID. Watch — same product, operator view."
34	Platform dashboard → show tenant list	"One operator. N hospitals. Tenant-level feature flags. AI on or off per hospital. New hospital onboards in 10 minutes."
35	Pause — wrap	"57 modules. 5 production AI features. Full IPD, OPD, pharmacy, lab, billing, MAR. Multi-tenant SaaS. NABH-aligned. Deploys to any cloud. That's Ayphen HMS."

If something goes wrong — say this

AI button shows error

"Free tier rate limit — paid tier removes it. Let me click again."

Page is slow

"First load after a quiet period — they warm up fast. Production runs on dedicated infrastructure."

You forget the next step

"Let me show you something else first." — buy 5 seconds, then continue.

Buyer asks a hard question

"Great question — let me note it and get you a precise answer after the demo." — never bluff.

Three closing lines — pick the one that fits the buyer in front of you

For a CFO buyer

"Five AI features at a price Indian hospitals can actually afford. The bundle is what's new — not any single feature."

For a CTO buyer

"One transaction for the discharge — admission, bed, housekeeping, email. Atomic. Idempotent. The kind of integrity Epic costs ten million dollars for."

For a hospital owner

"Apollo has it but you can't buy it. We're available to a 200-bed hospital today. 30-day pilot, your team, your data."
